WORK EXPERIENCE

Web Developer

WeBeeline | 08/2022 - Present

- Developing a SaaS platform with 8 applications to manage all processes in a hotel network comprising 36 hotels across the European Union. The front-end development uses a combination of JavaScript, ReactJS, and TypeScript, while the back-end is developed with PHP using the Laravel framework.
- Building over 20 websites from scratch and implementing designs using the WordPress CMS, including Advanced Custom Fields, WooCommerce, Gravity Forms, and Yoast SEO.
- Collaborating with 6 developers and project managers, among other teammates, to create robust web applications and deliver them on time, even under pressure while handling multiple planned and unplanned projects.
- Using my communication skills and critical thinking, I provide mentorship and code reviews to team members, explain complex concepts, and ensure smooth operation throughout all stages of development.
- Participation in meetings, planning and discussion of current projects to be proficient in prioritizing tasks and responsibilities.
- Researching and analyzing new features to implement in current projects to make them easier to maintain and improve.

Web Developer

Breakwater Vantage | 07/2023 – 09/2023

- Developed scalable and maintainable front-end architecture and user interfaces using JavaScript and the React JS framework, based on best practices of semantic HTML and coding standards.
- I used NodeJS to develop the system's back-end, implementing authorization and CRUDE (Create, Read, Update, Delete) logic.
- Refactored previously developed code containing over 5000 lines and optimized the web infrastructure to improve website loading time and enhance user experience.
- Demonstrated teamwork skills by facilitating effective communication between frontend, backend, and design teams during the development process while maintaining a high level of discipline.
- Provided a comprehensive solution for a multi-page website using React JS and Node JS, following best coding practices. The interface is based on UX, design patterns, and responsive design methodologies, ensuring high cross-browser compatibility and responsiveness.

Web Developer

IdoSell(IAI) | 05/2019 –08/2022

- Improved and maintained the template engine in the company's custom ERP e-commerce platform for online stores using JavaScript and React JS. This was done to provide convenience for 200 developers working on store templates.
- Improved and maintained a booking system for the short-term rental industry that contains over 1000 hotels and a channel manager, using JavaScript and React JS.
- Build 50 online store templates using Java Script and good coding practices based on UX designs and user requirements. Ensure SEO best practices are implemented to improve website performance.
- Various authoring tools were used to create dynamic, responsive web pages and web applications that are maintained.

- Used conduct research skills to stay updated on web commerce trends and technologies, ensuring the delivery of state-of-the-art solutions.
- Advanced source code management techniques were utilized to facilitate team collaboration, version control, and efficient debugging.
- Displayed strong accountability by meeting project deadlines and delivering high-quality coding solutions.
- Provided customer support, resolved issues, conducted research, and tested ideas to determine the technical feasibility of client ideas and customer-facing to meet customer needs.
- Consistently encouraged junior developers to learn new technologies and improve code efficiency
- Displayed proactive ownership in troubleshooting and debugging tasks and consistently provided support to the other developers to improve and fix bugs for maintainable projects and optimized web performance.
- Build good working relationships with clients by establishing rapport.
- Took the initiative to learn new software tools and languages outside of work hours, contributing to more efficient front-end development.
- Prepared reports, manuals and other documentation on the status, operation, and maintenance of software
- Leveraged a positive attitude to facilitate effective communication and collaboration with other team members, including designers, back-end developers, and project managers, to achieve optimal results.
